

**Description / name of special machine**

4-way stone tongs

Function / job

Internal transport of aerated concrete blocks in production

Special features

Owing to the integrated intelligent steel structure the power-to-weight ratio is extremely good. Hermetically shielded guides with a central lubrication are rated for a maximum life. Spherically held clamping jaws ensure an ideal distribution of stress in the block, thus considerably reducing the risk of breakage!

Technical data

Carrying capacity: 8000 kg
Clamping range: 900 mm - 1900 mm
Own weight: 3100 kg
Clamping length: 4 x 1500 mm
Powered by: Output-regulated hydraulic unit

Customer

Hebel Porz GmbH

Realization period / year

April 1997

Ident No.
502 0 471 DB

Month / year
05/98
