

Function / job

Conveyor belt for the emptying of truck mixer drums

Special features

Conveyor belt, mounted to the truck mixer. In transport position it is accommodated in the area of the mudguard/mixer drum. This is possible because a very narrow construction was designed, with integrated extendable hydraulic lines which power the conveyor belt. As a beneficial consequence, the truck mixer has a low center of gravity.

Technical data

Basic length	6140 mm
Telescope range	4800 mm
Dead weight	2200 kg
Width	390 mm
Belt speed	3.5 m/sec

Customer

Intermix GmbH

Realization period / year

March 1998

Ident-Nr.

502 0 940 DB

Month / year

03/98
