

**Description / name of special machine**

Plunger cylinder with return spring

Function / job

Height compensation of traverser - autoclave outlet

Special features

An electrically operated seat valve in the cylinder bottom allows exact positioning and holding under load. A switch bar through the cylinder bottom serves as position control. A heat-treated pressure button is screwed into the piston rod.

Technical data

Diameter:	60 / 80 mm
Stroke:	20 mm
Operating pressure:	250 bar
Testing pressure:	350 bar

Customer

Hebel Emmering GmbH & Co.

Realization period / year

August 1998

Ident No.
502 1 420 DB

Month / year
08/98
