

## Description / name of special machine

Roller conveyor for transporting machine furnaces

## Function / job

Transverse transport of machine furnaces during filling with liquid aluminum

## Special features

Robust design suitable for feeding with fork lift trucks. Transverse transport of machine furnaces by hand, in some cases foot-operated by claws

## Technical data

Belt length:	7300 mm
Belt width:	1350 mm
Load-carrying capacity:	12 t
Application:	in three shifts

## Customer

BBS AG, Schiltach

## Realization period / year

June 1999

Ident No.  
502 2 689

Month / year  
06/99
