

Description / name of special machine

Disengaging grab

Function / job

Controlled disengaging of test weights in a rim testing machine.

Special features

This grab can be connected directly to a measuring computer, requiring only a minimum of electric power, thus considerably facilitating the evaluation of the readings.

Technical data

Load-carrying capacity:	1.5 t
Voltage:	24 V / DC
Disengaging time approx.:	20 ms

Customer

Hofmann GmbH

Realization period / year

June 1999

Ident No.
502 3 003 DB

Month / year
06/99
