

Description / name of special machine

Decoring machine for spoked rims

Function / job

Removal of mould sand from hollow spokes of a rim.

Special features

This machine loosens and removes the mould sand by vibrating the clamped rim and at the same time rotating it. The vibration energy is steplessly adjustable. The machine is SPS controlled. A big loading hatch makes loading user-friendly.

Technical data

Speed of rotation:	0.3 – 3 r/min.
Drive output:	0.3 kW
Application:	multi-shift
