

### Description / name of special machine

Double grab for long pin bearing

### Function / job

Grab for handling of aluminium round stock in automatic bearing

### Special features

Special self-designed hydraulic unit are used to meet specific requirements regarding minimum overall width and minimise interfering contours. Tongs can be operated independently.

### Technical data

Load-carrying capacity max.:	1500 kg
Closing force per pair of grabs:	2 x 15 kN
Closing time ca.:	1.9 sec.
Hydraulic unit:	10 l/min, 250bar

### Customer

Unterschütz Sondermaschinenbau, Walbeck

### Realization period / year

May 2004

Ident No.  
502 9 741

Month / year  
05/04
