

Description / Name of special machine

Scissor-type grab, 100 kg, for square-cut blocks

Function / Job

Load-handling device for the lifting and same-orientation picking and placing of square-cut loads.

Special features

The load is taken up in a force-fitting grip by means of 2 grabs that are placed on the center of the load, and the own weight of the load. The grab arms are held in pin bearings. The gripping action is mechanical, through the own weight of the grab arms and the lifting of the load.

Technical data

Load-carrying capacity max.	100 kg
Grab width	50 – 150 mm

Customer

Plansee GmbH

Realization period / Year

From December 2011
