

Description / Name of special machine
Scissor-type grab, 100 kg, for circular blocks

Function / Job
Load-handling device for the lifting and same-orientation picking and placing of circular blocks.

Special features
The load is taken up in a force-fitting grip by means of 2 grabs that are placed on the center of the load, and the own weight of the load. The grab arms are held in pin bearings. The gripping action of the grab arms is mechanical, through the own weight of the grab arms and the lifting of the load.

Technical data
