

Description / name of special machine

Set-up station

Function / job

Lift-and-turn table for the changing of workpiece pallets for milling machines

Features

The station has been designed for installation in a pit and is equipped with an in-ground cladding. The lifting unit is powered by two hydraulic cylinders and comes with a stepless height adjustment. The slewing gear consists of a toothed ball-slewing connection which is driven by an electric motor.

Technical specifications

Dimensions	6000x1640x1200 mm
Lift	600 mm
Load-carrying capacity	max. 4000 kg
Turning range	+180° / -90°

Customer

Liebherr-Verzahntechnik GmbH

Realization period / year

From May 2015

Ident No.
505 7 210 e

Month / year
