

Description / name of the special-purpose machine

Emergency unit 18 kW

Function / task

Self-sufficient supply for external consumers with a hydraulic pressure of 350 bar and electrical voltage.

Specific features

A water-cooled diesel engine enables the emergency operation of an external consumer with hydraulics and 24V voltage. The diesel engine can be started electrically. The tube holders at the front are extendable. The unit can be lifted by crane and moved by fork lift.

Technical data

Flow rate	60 l / min
Motor power	18 kW
Hydraulic pressure	max. 350 bar

Customer

Liebherr Werk Nenzing GmbH

Realization period / year

from March 2019

Ident-No.
506 5 985
