

### Description / Name of the special machine

Drive unit air conditioning with additional hydraulic pump

### Function / Task

Maintenance of the on-board voltage, air conditioning of the cabin and preheating of the hydraulic oil tank when the main engine of crawler cranes is switched off.

### Particularities

A diesel engine enables the unit to operate independently.  
The drive unit which can be lifted by crane and moved by fork lift is attached to the superstructure of crawler cranes.

### Technical data

Engine speed	3200 rpm
Motor power	10.2 kW
Pump capacity	24 l/min at 3200 rpm

### Customer

Liebherr Werk Ehingen, Germany

### Realization period / Year

From March 2021

Ident-No.  
5070449

Month/ Year  
11/2021
